"Postcards of Peace from Terrence"

*Terrence Webster-Doyle, President,
Atrium Society - Educators to End Conflict,
Honorary Professor of Samara State Institute of Culture*

"If we try to bring about peace, whose peace are we advocating as the one that will do it? Are we saying that "all paths lead to peace" and therefore we need to embrace all "paths of peace"? How can "knowledge" put an end to the knowledge that is creating conflict? Do we need more knowledge to counter the information that is dividing us and creating conflict? Self-understanding is understanding the whole human race, for we are the world and the world is us".
